From the harbour of the Limnology Centre we will take one hour tour with the traditional sailing boat „kale“. Eel soup and home-made cake on the board. The captain of the kaleship will give an overview about the kaleship and the nautical heritage of Lake Võrtsjärv.

For the summarising activity we will offer the visit of the Marjasoo Farm – this is a berry-frowing farm in peat fields where we can find blueberries, cranberries, and different peat loving plants like rhododendrons etc. The host of the farm will offer to taste some of his products like juices or juice puree and the visitors will have an opportunity to buy the one they like most.
